

Didsbury EZI-LIFT cover lifters provide a safe and easy-to-use method of lifting and moving covers. Incorporation two sets of rollers at the end of the lifter, the EZI-LIFT locates either directly or through adaptor bars to the cover keyholes. The rollers serve as a fulcrum point when downward pressure is applied to the handle, lifting the cover with minimal effort to reduce the risk of back injury to the operators.

- Two handed operation.
- Handles fold down for compact storage.
- Wide nylon rollers at fulcrum point provide excellent stability.
- Variety of remote keys to lock adaptor bar to cover.
- Overall length: 1300mm (4'3").
- Weight: 14kg (15lbs).

Adaptor Bars

For use where keyholes are not adjacent to the edge of the manhole cover.

Combination adaptor bar used with the Companion Model.

Overall Length: 865mm (2'10").

Weight: 9kg (20lbs).

Keys
