

Environmental Policy Statement

The Didsbury Engineering Company is an independent company that is committed to providing quality service and products to customers in a manner that ensures a safe and healthy workplace for all employees and minimises the potential impact on the environment. The Company will operate in compliance with all relevant environmental legislation and strive to use pollution prevention and environmental best practices in all its activities.

- Awareness of the impact on the environment is taken into account when making management decisions.
- Staff/employee awareness of environmental issues is undertaken through notices and training programmes.
- Re-cycling of waste is undertaken when there is no adverse commercial impact on the company.
- Waste and other discharges are managed through the employment of licenced contractors.
- Energy and other resource consumption is monitored to ensure effective use.
- Reviews are undertaken to improve the strategies that affect the environment.
- Hazardous materials and operations are minimised or avoided in all instances.
- Legislative compliance is made with respect to all environmental, and health & safety, statutes in force that may affect current and future activities.
