Companion Cover Lifter

EZI-LIFT Part no.10/1415

The Didsbury **EZI-LIFT Companion Cover Lifter** has two fold down handles, for one-man operation where keyhole positions allow for an adaptor bar to be locked along the centreline of manhole cover.

The manhole cover lifter is a safe and easy-to-use method of lifting and moving covers. Incorporating two sets of rollers at the end of the lifter, the EZI-LIFT locates either directly or through adaptor bars to the manhole cover keyholes.

The rollers serve as a fulcrum point when downward pressure is applied to the handle, lifting the cover with minimal effort to reduce the risk of back injury to the operators.

Features

- Two handed operation
- Handles fold down for compact storage
- Wide nylon rollers at fulcrum point provide stability and easy to manoeuvre
- Heel projection on lifters gives extra leverage to loosen tight or frozen covers prior to lifting
- Variety of remote keys to lock adaptor bars to manhole covers
- Requires Combination Adaptor Bar part no.10/1917 and Standard (Stockport) remote keys part no.10/1445 for fixing along centreline of manhole cover

Overall Length: 1300mm

Length when folded: 800mm

Weight: 12 kg

Adaptor Bar Overall Length: 865 mm

Weight: 9 kg
