

Didsbury Engineering have a range of cases to suit the individual requirements of our hoist kits, for the Defence, Civil Aerospace and Industrial Safety.

These cases are typically manufactured to ATA 300 specifications and are available in a range of colours and finishes to suit the end customer requirements.

Typical Outline Specification

- Manufactured to ATA 300
- Edged with aluminium angle on all edges, all fittings secured with bilocated rivets
- Hinged lid, secure lockable butterfly catches, handles for lifting and handling
- Interiors lined with LD 45 high-density foam, with custom routed interiors

Options

- Castor wheels and/or forklift skids as required

For other items of kit, such as our PRG358 Purge-Air Lighting Kit comes in a Peli Storm Waterproof Case with custom inserts.
